NEWS RELEASE

Morningbird Media Collaborates With the AAMU-RISE Foundation to Develop Materials for NASA Project

Normal, Alabama, USA, July 1, 2016 — Morningbird Media Corporation has been awarded a Phase I STTR contract from NASA and has entered into an agreement with the Alabama A&M Research, Innovation, Science, and Engineering (AAMU-RISE) Foundation, which will provide research support. The contract, (NNX16CM40P) "Development of Additive Manufacturing Techniques for the Production of Electronic Devices," will enable Morningbird to development materials and processes to 3D print functional electronic devices.

The [AAMU-RISE Foundation](#), founded in December 2014, is the contracting entity for Alabama A&M University. Its business is research and development, which is critical to innovation because it is the investment in technology that enhances capabilities and transforms ideas into products, processes, and services.

The mission of Morningbird Media is to enable innovation. The Electronic Alchemy 3De Printer system will consist of a printer, the EA Design Cauldron design and layout software, multi-material cartridges, and membership into a design community that will allow you to find and download designs, as well as contribute your own.

The partnership between Morningbird Media Corporation and the AAMU-RISE Foundation has resulted in a powerful capability for research and development.
